

## COMMANDER Propulsion Control Systems

**RADAMEC RCS™**  
CONTROL SYSTEMS LTD

[www.radamec-controls.co.uk](http://www.radamec-controls.co.uk)

### COMMANDER Propulsion Control System

Radamec's 40 years of experience in the design and manufacture of control systems brings Commander, the professional Propulsion Control System. The Commander control system is sophisticated and flexible with a wide range of features providing improved vessel performance and operator control.

The Commander is simple to install and setup saving on installation time and cost. Once installed, system accessibility can be restricted, avoiding inappropriate tampering. A built-in diagnostic log aids quickly identifying propulsion system problems, saving owners significant downtime and expenditure.

*Radamec's experience of providing propulsion control systems to some of the most prestigious applications ensures that the Commander control system is the professional choice.*

### FEATURES

- 40 x 2 line menu driven LCD display for easy system adjustments
- Separate plug-in control interface cards for easy signal interfacing
- Electronic and mechanical interfaces available  
Compatible with third party control heads

### AVAILABLE SIGNAL INTERFACES

4-20mA output    4-20mA input    10 switched outputs  
0-10V output    0-10V input    8 switched inputs  
PWM output
