

KINETIK Propulsion Control Systems

The Kinetik range is compact, lightweight and compatible with virtually all engine and gearbox combinations.

This advanced controller combined with our IP67-rated Compact Control Head creates a dependable system which provides with either electronic output or optional dual actuator control of the engine and gearbox.

Kinetik electronic controls offer greater refinement and degree of control over traditional mechanical systems in addition to reducing wear and tear on the engine and gearbox.

FEATURES

- Single or twin engine from one controller with Kinetik Blue
- Single engine, gearbox and propeller pitch with Kinetik Red
- Up to 3 Control Stations per controller, expandable with multiple controllers
- Simple to Install
- Lightweight and compact

KINETIK BLUE

Propulsion control for fixed pitch propeller systems with reversing gearboxes. A single Kinetik Blue controller operates a single or twin engine and gearbox installation with up to three control stations.

KINETIK RED

Propulsion control for controllable pitch propeller systems, engine and gearbox. A single Kinetik Red controller operates one engine, a gearbox and the propeller pitch with up to three control stations.

Perfectly suited in terms of price and features for yachts, fishing vessels and small commercial craft, Kinetik is the benchmark system for vessels in these classes.
